| Kestrel nest box | TVLT1 | Water-resistant plywood<br>18 mm | 15 kg  | 64x55x48cm         | fixings & wood shavings           |

## Installation instructions

1

2.1

**1 Placement:** before installation, add a layer of fine wood shavings to the nest box.

**2 Location:** the kestrel nest box can easily be installed on a wall, post (2.1) or tree (2.2) using the mounting openings in the rear panel of the box. Install the box at a height of approximately 6 m at the edge of a field or pasture, facing southeast. Ensure that the kestrel has a clear view. Kestrels prefer boxes from which they can overlook their foraging area.

2.2

### **Project-related requirements and Building Regulations**

Specific project-related requirements and the guidelines of the Building Regulations must be adhered to at all times.

### **Construction**

Specific situations, building systems or prefab constructions must always be carried out in consultation with and on the advice of the manufacturer and project-specific consultant. This concerns advice in the areas of structural engineering, fire safety, and building physics.

### **Inspection and repair**

Check for any damage to and around the provision. Repair any damage
